

**Twist**<sup>®</sup>  
shelf instructions

1

Locate the steel pin on the backside of the shelf frame and insert into the crevice of the Twist extrusion upright

2

Hold the shelf frame at the required height and tighten the wing nuts to keep the shelf in place.

3

Before attaching the graphic to the Twist, make sure the rotatable arms are in this position.

4

When the Twist graphic has been attached, rotate the arms 90° so that they poke through the Twist graphic.

5

Locate the four magnetic disks on the underside of the wooden shelf.

6

The magnetic disks will magnetically attach to the shelf frame arms.
